Capital Cascades Trail Segment 3 Skateable Art

Project Highlights

- The FAMU Way Skateable Art Project will embrace artistic elements to provide an optimal riding experience for park users and also provides a visually stimulating space for spectators.
- It includes a larger than life center piece, a rattlesnake that pays homage to the FAMU Rattlers. While the overall park is approximately 540 feet long, the snake run feature stretches roughly 225 feet, making it the longest snake run in Florida.
- Design-Build Skate Park Specialists, Team Pain, was selected for the project.

Current Status

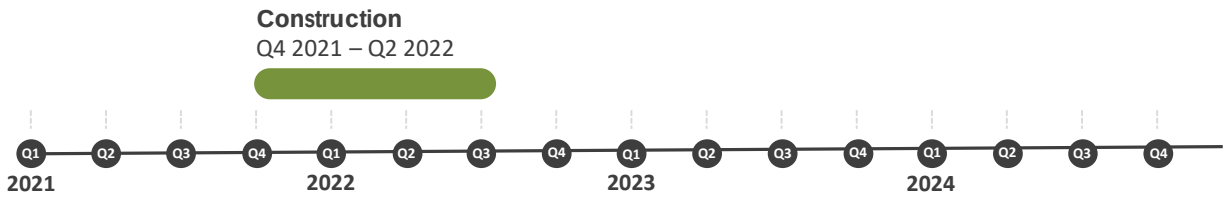
- Design and permitting is underway on the skate park.

08.24.2021

Next Steps

- The project is in the final stages of permitting and construction is anticipated to begin in Q4 of 2021.

Timeline



Community Engagement: Public engagement is ongoing through all phases of a project, from concept to construction, programming, and maintenance. Public engagement is two-way communication inclusive of all decision-makers and stakeholders. Each Blueprint project will have a customized Public Engagement Plan that is developed at the start of the project, and outreach activities and techniques will vary from project to project, as each project's outcome and stakeholder community character is unique.

Construction: This project is a design build project. Construction work will fully implement the final design plans for Skateable Art.
