

Alternative Sewer Solutions

Project Highlights

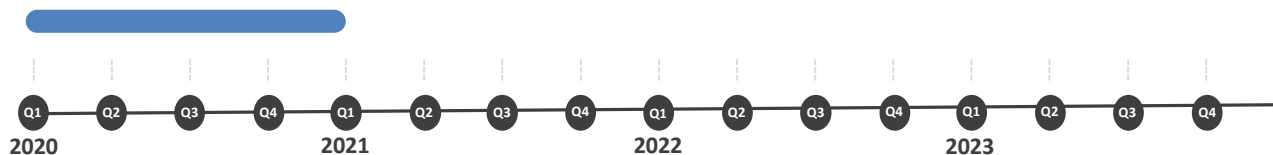

- Project provides funding for the Alternative Sewer Solutions Study; study area is unincorporated Leon County, and includes Primary Springs Protection Zone.

Current Status:

- Leon County is currently managing the first phase of this project: the Comprehensive Wastewater Treatment Facilities Plan (CWTFP), which began in November 2019.
- Consultant firm, Jim Stidham and Associates, is leading the CWTFP, including the public input opportunities.
- The first round of public meetings are planned for 2020 which relate to the nitrogen reduction performance for alternative treatment systems and the factors influencing selection of treatment technology.
- Remaining phases will evaluate financing and management structures.
