Market District Placemaking

## Project Highlights

- This project will create a new park along Maclay Boulevard and will improve pedestrian connectivity in and around the Market District.
- The first phase of the project will design and create the central park and other improvements, such as planned trails and pedestrian improvement projects, will be implemented following the completion of the park.

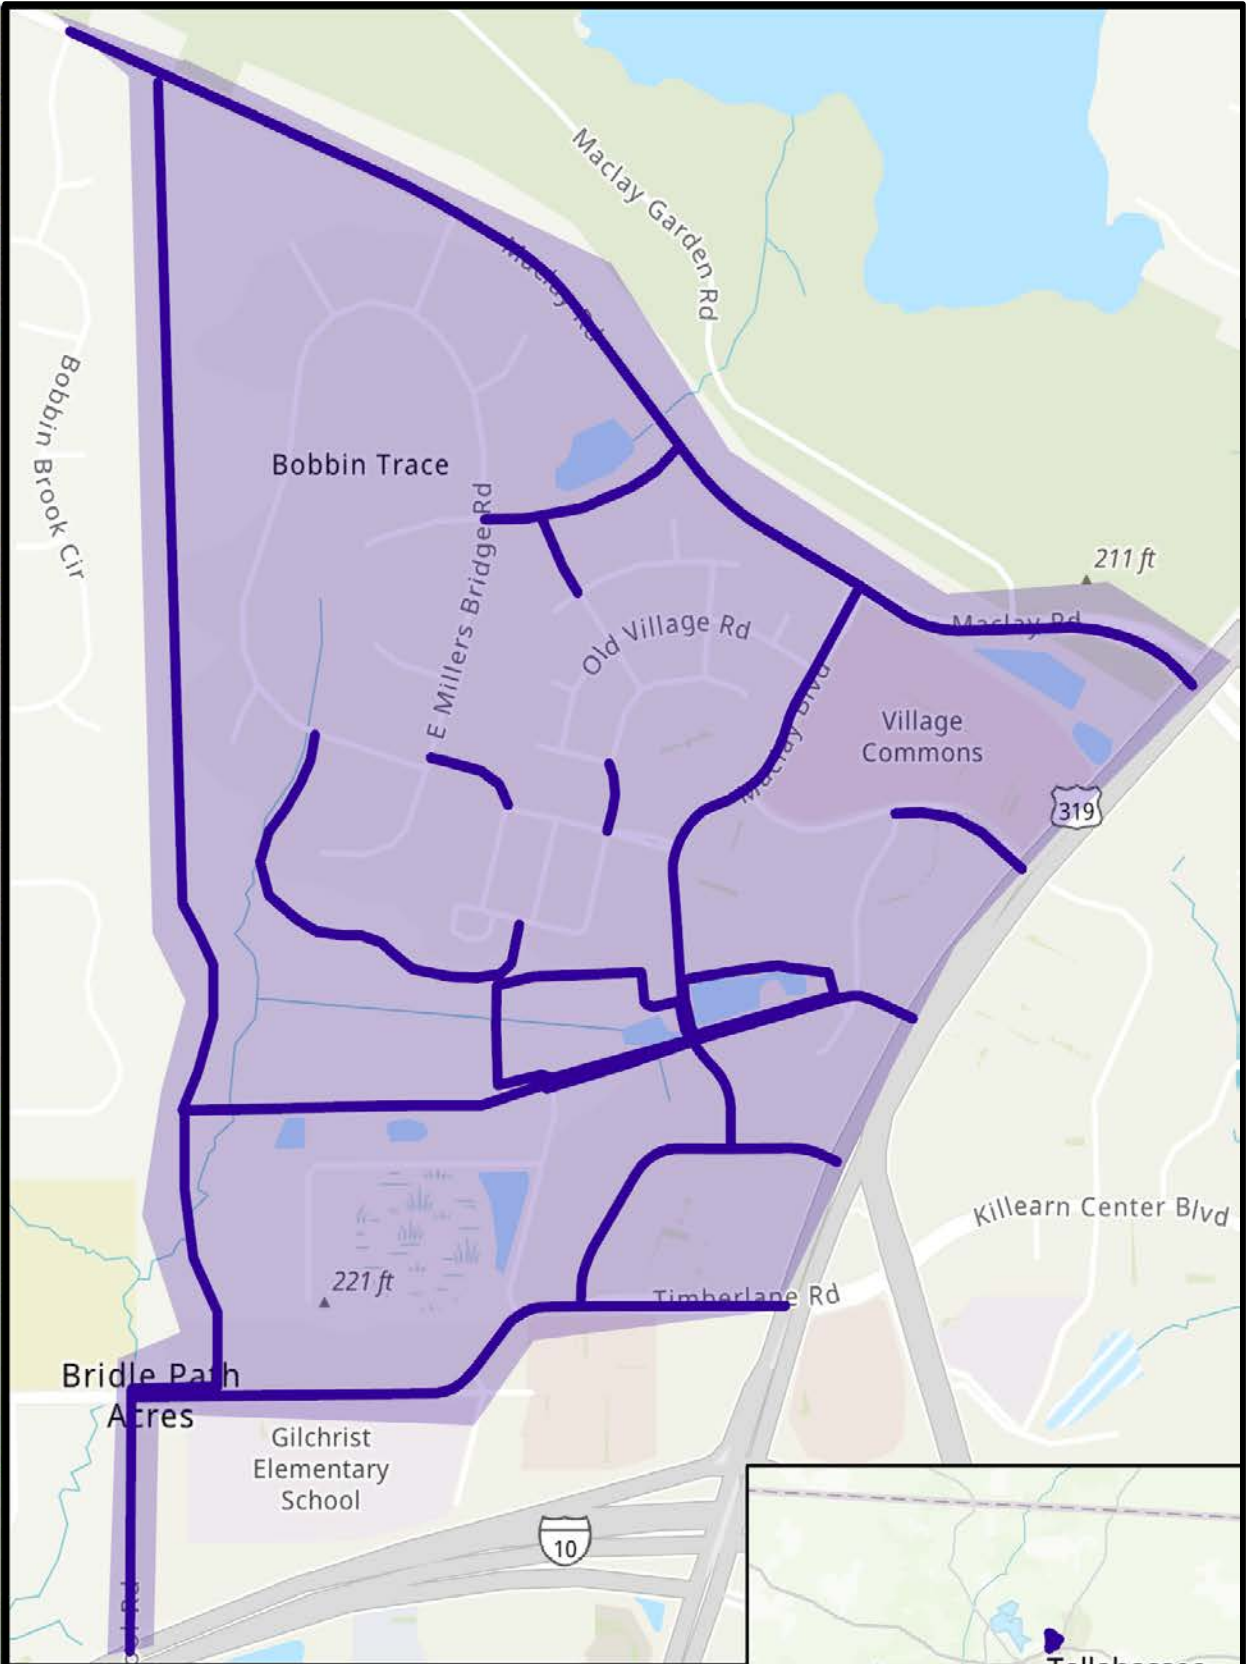

### Current Status:

- The City awarded a contract to DBP and Associates for Design and Planning services to repurpose an existing stormwater pond where the central park will be located.
- Blueprint is utilizing the same consultant for the central park planning and public engagement efforts, such as website and survey creation, are underway.
- Staff anticipates public outreach to begin in August 2020 to support the development of a concept plan for the park space.
