

*Capital Cascades Trail
Restroom*

Project Highlights

- The new restroom facility features two family restroom stalls near the existing playground and Railroad Square, on the north side of FAMU Way.
- Innovative stormwater treatment facilities are part of the project through the implementation of a green roof and cistern system that treat the stormwater at the facility and use the runoff stormwater to irrigate the green roof system.
- This public restroom serves the FAMU Way playground constructed by Blueprint in 2016 and the Skateable Art and Coal Chute Pond amenities found nearby.

Current Status

- Construction services were procured in 2021 and awarded to Oliver/Sperry.
- The restroom is now open to the public, and the green roof and water harvesting system installation is complete.

Timeline

Community Engagement: Public engagement is ongoing through all phases of a project, from concept to construction, programming, and maintenance. Public engagement is two-way communication inclusive of all decision-makers and stakeholders. Each Blueprint project will have a customized Public Engagement Plan that is developed at the start of the project, and outreach activities and techniques will vary from project to project, as each project's outcome and stakeholder community character is unique.

Construction: Construction work will fully implement the final design plans for FAMU Way Playground Restroom.

Q1: January – March

Q2: April – June

Q3: July – September

Q4: October – December
