

## Project Highlights

- This project includes two phases. The first is to reduce rainwater impacts, or make weatherization improvements on the Amphitheater stage. The second is to procure a new house speaker system that will reduce the impact of sound from the amphitheater on the nearby neighborhoods.
- The Amphitheater Weatherization project was completed in late 2020.

## Current Status

- A contract has been awarded for the second phase of this project.
- The project team is analyzing speaker model types as well as mounting and aesthetic impacts to meet project goals.

## Next Steps

- The speaker recommended by the acoustic engineer and consultant will be modeled in the amphitheater and its performance assessed.

## Timeline

Procurement and Installation of Speakers  
Q1 2021 – Q2 2022

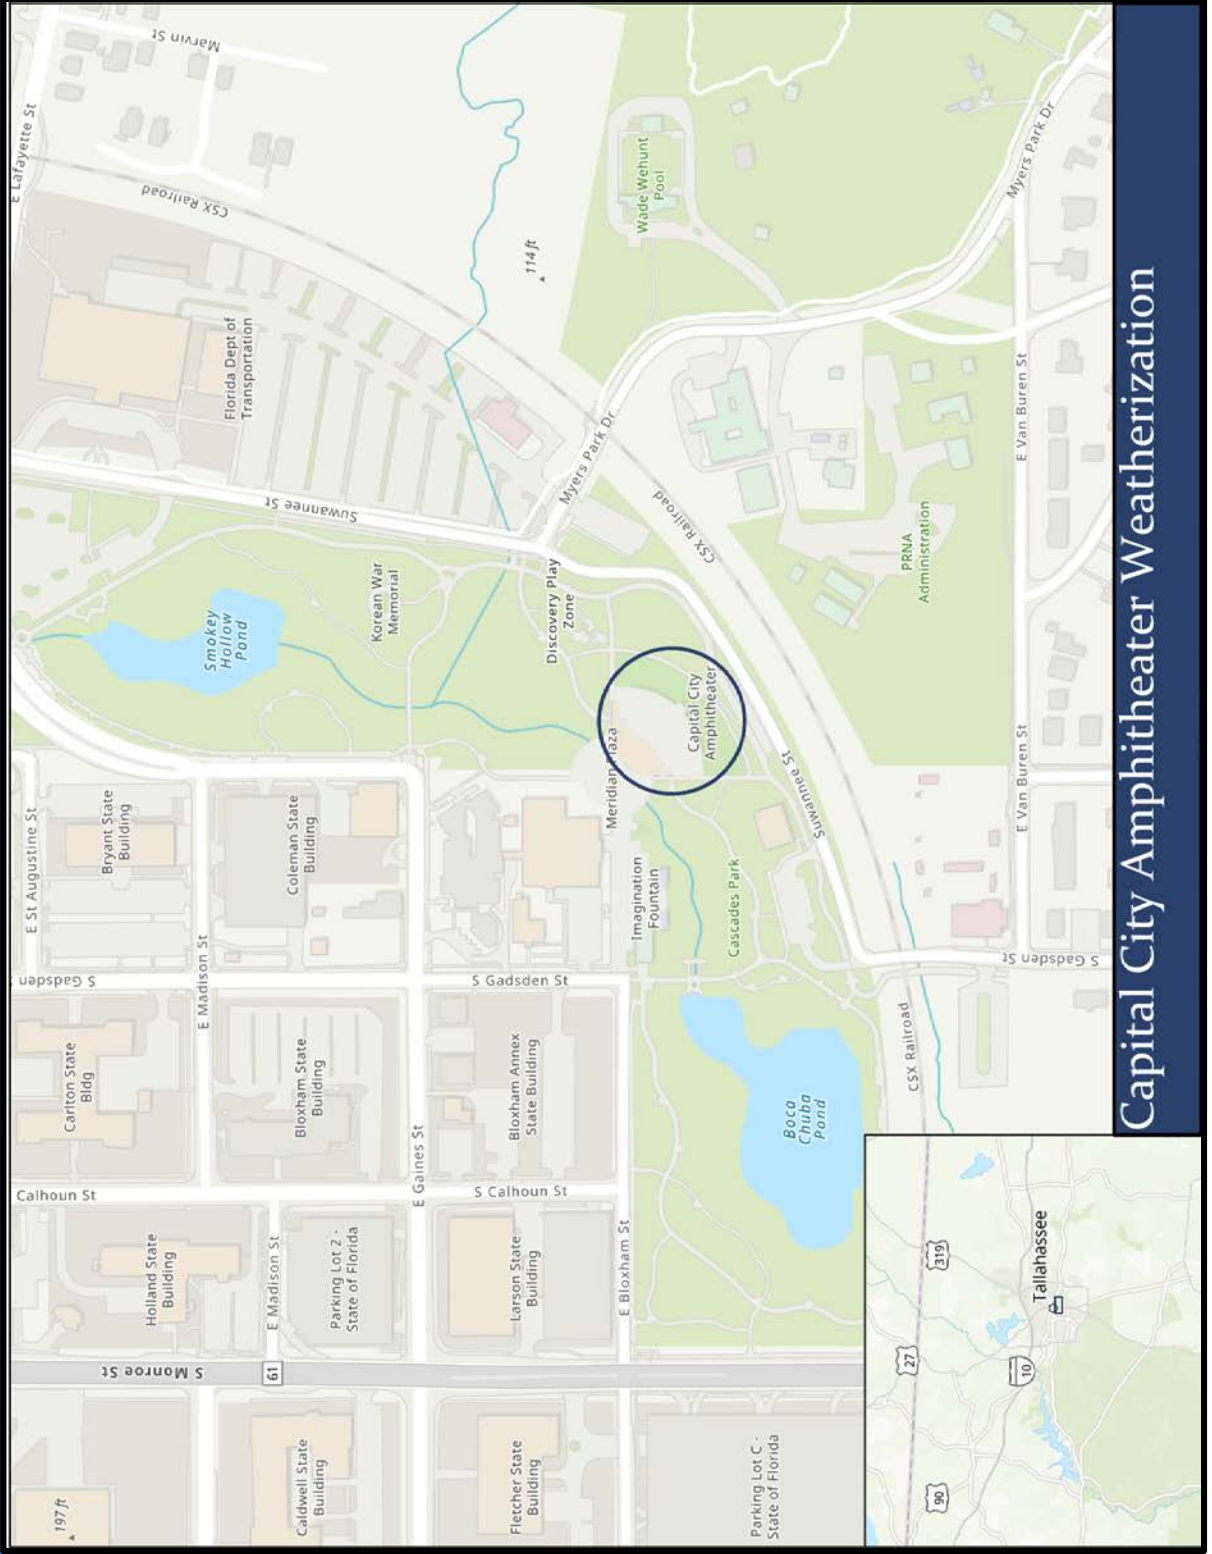

---

**Procurement:** This phase involves identifying the appropriate procurement method for the project, entering into a contract, and acquiring parts and services from a vendor.

**Installation:** This phase of the project includes removing the old system, installation of the new system, integration, testing, tuning, and staff training.
